

Configure ShadowsocksR Mobile VPN - Android Devices

From your Google Play Store, download the ShadowsocksR app by Sunshine Android developer. It has an icon that looks like this:

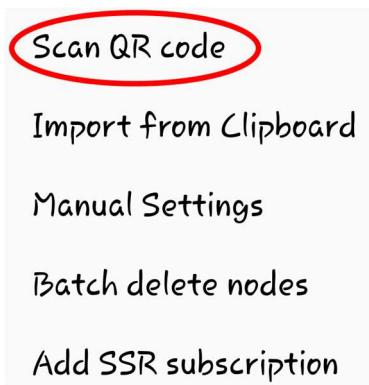

Once installed on your Android device, open up the ShadowsocksR app.

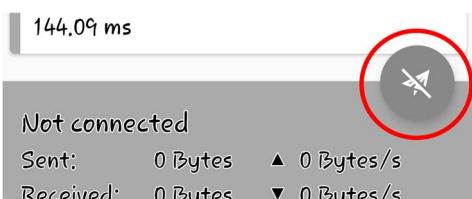

1. In the top right corner click on “+” icon (in the red circle on the picture):

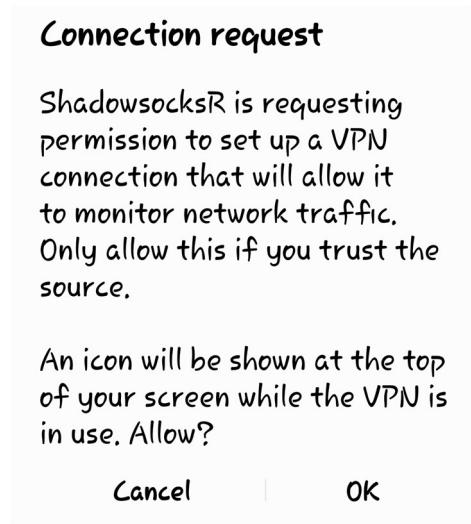

2. Choose “Scan QR code” (in the red circle on the picture):

3. After you gave a permission to your camera, scan the first QR code that you have received from helpdesk@gtt.tools. (If you have not received this information it can be obtained by writing to helpdesk@gtt.tools).
As soon as you do that the ShadowsocksR server details will show up in your app.
4. Click on the grey circle in the bottom of your app (in the red circle on the picture) to get connected:

5. Once you do that the following window will pop up:

Click OK.

Once you get successfully connected, the icon at the bottom of the screen will turn green like this:

You will also see a ShadowsockR icon that appears as a paper plane on the top left corner of your device (in the red circle on the picture):

You can also check that you actually connected by browsing to:

<https://globaltech.team/vpncheck.php>

To disconnect click on the green circle in your app:

You can also add our other ShadowsocksR servers by scanning each of the rest of your QR codes.

In general, you should setup and use the servers that is geographically closest to you as that will provide you the best internet speeds. If you are in Asia or South America, use the east coast US servers. For Europe and Africa users, connect to the Europe or west coast US servers. However, you are welcome to connect to whichever one provides you with the best and fastest connection for you.

All your keys for the SSR servers as both a QR Code and in a text SSR Link format can be also found on this website:

<https://ssr-qr.gtt.tools>

Once you are there log in with your username and PIN code you received from us.
