Configure ShadowsocksR Servers - Windows
_____

1. Download appropriate version of ShadowsocksR program for your Windows computer from here: https://share.gtt.tools/d/8b00e3a5534942fab57a/

2. On your C drive create a folder and call it ShadowSocksR.

3. Once your download ShadowsocksR program unzip it in your ShadowSocksR folder. After unzipping, double click on ShadowsocksR.exe file to start it.

4. The following window will pop up:

5. Click on More info and click on "Run anyway".

6. Click on "Allow access" on the next window that will pop up.

7. The program icon as a paper airplane sign that looks like this:

will appear at the right bottom corner of your computer.
If it does not come up expand notification tray at the right bottom corner of your computer by clicking at ^ symbol (in the red circle on the picture) and you will find it there:
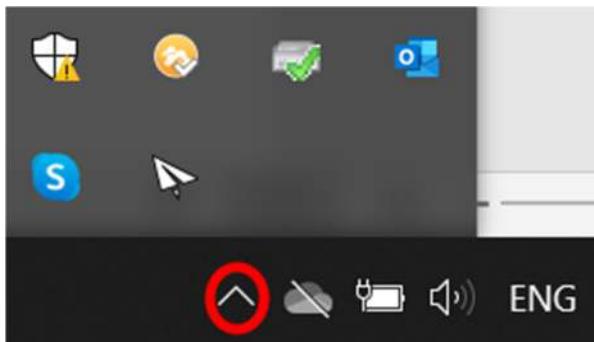

8. Using your web browser, go to https://ssr-qr.gtt.tools and log in with your username and PIN code you received from us. After you do that, a web page will display all your keys for the SSR servers as both a QR Code and in a text SSR Link format. You can also receive this information in an email by writing to helpdesk@gtt.tools).

9. To load in these SSR Keys, center on your screen one of the QR codes from the web page or email. Then right click on the paper airplane icon and choose "Scan QR code from screen" (in the red circle on the picture):
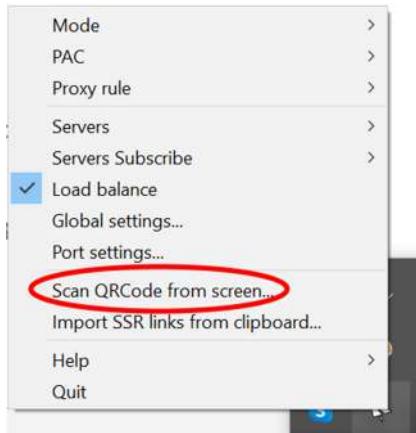

10. The program will scan the first QR code that you have received from helpdesk@gtt.tools. When you do that, the ShadowsocksR server details will show up in your app.

11. If you click OK (in the red circle on the picture) that will start your connection to the added ShadowsocksR server:
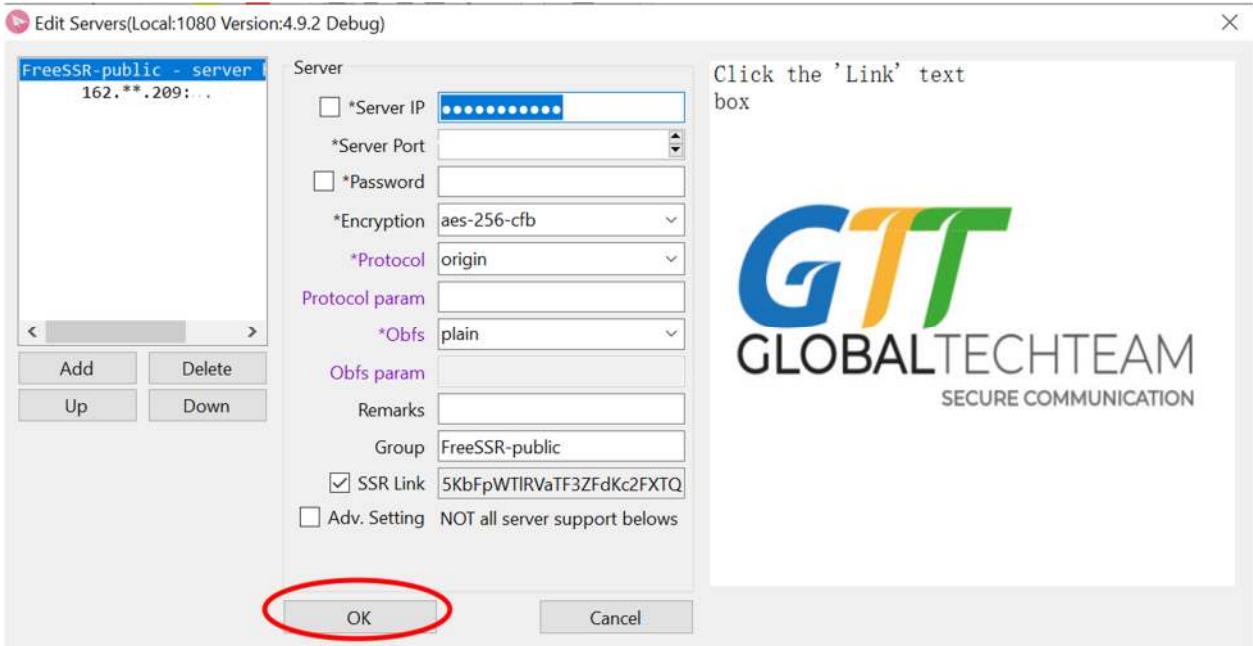

12. To help remember what country the server is located in, fill in the "Remarks" section with the server name.

13. You can check that you actually connected through the VPN by browsing to:

https://globaltech.team/vpncheck.php

14. To disconnect right click on the paper airplane icon and click on "Quit: (in the red circle on the picture):
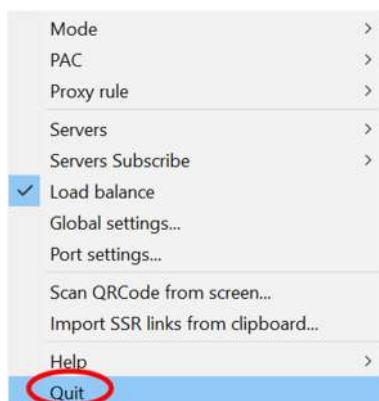

In order to start up your ShadowsocksR program you need to find it again in your ShadowsocksR folder on your C drive where you saved it initially.

You can also add our other ShadowsocksR servers by scanning each of the rest of your QR codes that were not added.

In general, you should setup and use the servers that is geographically closest to you as that will provide you the best internet speeds. If you are in Asia or South America, use the east coast US servers. For Europe and Africa users, connect to the Europe or west coast US servers. However, you are welcome to connect to whichever one provides you with the best and fastest connection for you.
